SUMMARY

I am creative and detail-oriented Front-End Engineer with a strong foundation in HTML, CSS, Tailwind, JavaScript, and modern frameworks like React. Skilled in building responsive, user-friendly web interfaces and optimizing performance for seamless user experience across devices. Experienced in collaborating with cross-functional teams and delivering projects on time. Adept at using version control (Git).

TECHNICAL SKILLS

- Programming Frameworks: ReactJs
- Web Technologies: HTML, CSS, TailWind, JavaScript.
- Source Control: Git (GitHub).

EXPERIENCE

COMPUTER TEACHER / ABBAVILE INTERNATIONAL ACADEMY

- Taught Computer Science and ICT Fundamentals to Primary Schools Students.
- Designed lesson plans, prepared teaching materials, and conducted practical sessions in Microsoft Office, and internet usage.
- Designed lesson plans, prepared teaching materials, and conducted practical sessions in Microsoft Office, basic programming, and internet usage.

INTERN / SRINGCORE-AFRICA

- Assisted in the development and maintenance of web applications and digital solutions for clients.
- Collaborated with senior developers to design, test, and deploy responsive websites and software features.
- Participated in practical tasks involving frontend development, basic backend integration, and version control using Git.
- Contributed to project documentation, debugging, and performance optimization to ensure clean, efficient code delivery.

PROJECT DELIVERY EXPERIENCE

ORACLEOUS (<https://oracleous.com>)

Successfully designed and developed a responsive website for **Oracleous** a palm oil processing company to establish a strong digital presence and improve customer outreach. The website highlights the company's services, production processes, and contact information, providing a professional online platform to attract potential clients and partners. Focused on clean design, fast load times, and mobile compatibility, the project aimed to boost the company's credibility and accessibility in an increasingly digital marketplace.

FORENE (<https://forene.netlify.app/>)

Successfully designed and developed a responsive website for **Forene**, a food research company dedicated to advancing innovation and safety in the food industry. The website showcases Forene's research focus, methodologies, services, and contact information, creating a credible digital presence for engaging researchers, partners, and stakeholders. Emphasis was placed on clean visual design, fast load times, and full mobile responsiveness to ensure accessibility across devices. The project aimed to strengthen Forene's professional image, improve information dissemination, and support collaboration in an increasingly data-driven food research landscape.

SPRINGCORE-AFRICA (<https://springcoreafrica.netlify.app/>)

Successfully designed and developed a responsive website for **Springcore-Africa**, a technology company focused on delivering innovative digital solutions across Africa. The website highlights the company's services, core technologies, projects, and contact information, providing a strong online presence for engaging clients, partners, and stakeholders. Emphasis was placed on clean UI/UX design, fast load times, and full mobile responsiveness to ensure seamless access across devices. The project aimed to enhance Springcore-Africa's brand credibility, improve client outreach, and position the company as a forward-thinking player in the African tech ecosystem.

HARAF (<https://haraf.netlify.app/career>)

Successfully designed and developed a responsive NGO platform focused on supporting humanitarian aid and community development initiatives across Africa. The platform was created to improve coordination between donors, volunteers, and partner organizations by providing features such as donation management, volunteer registration, campaign organization, and impact tracking. Emphasis was placed on clean UI/UX design, accessibility, and full mobile responsiveness to ensure a seamless experience across devices. The project aimed to strengthen community outreach, improve operational efficiency, and provide a reliable digital platform for driving social impact and sustainable development initiatives communities.

QUICK-CONSULT

Successfully designed and developed a responsive telemedicine platform aimed at improving access to healthcare through remote consultations and digital medical services. The platform enables patients to connect with healthcare professionals through secure video consultations, access e-prescriptions, and manage medical records efficiently from any location. Key features include appointment scheduling, real-time video communication, prescription management, and patient health record storage. Emphasis was placed on creating a clean, user-friendly interface, ensuring data accessibility, and optimizing the platform for seamless performance across desktop and mobile devices. The project was developed to enhance healthcare accessibility, streamline patient-doctor interactions, and support modern digital healthcare delivery.

EDUCATION

- **B.Sc Computer Science** - Federal University Lafia (In view)

OTHER CERTIFICATIONS

- **Techyjaunt Beginner Course in Frontend Web Development** 2025
- **Diploma in Information Technology** 2023
